

Projects using IDAPT today

Unnamed Project

- ⊕ IDAPT captures data from multiple components in a development vehicle for assessment in the field (20+ vehicles):
 - Integrated with the client's system.
 - Periodically sends data to a remote server for analysis.
 - IDAPT boots up independently to send status messages.
 - IDAPT boots up independently under normal conditions (wake on CAN).
 - Driver doesn't see IDAPT, embedded inside the vehicle without any need for user interaction.
