

Quantum®

# EASIER THAN THE CLOUD

**ACCELERATE ADAS DEVELOPMENT** with Quantum Automotive Data Collection and Storage Solutions for a fraction of the cost of traditional IT Storage Strategies or Public Cloud Options. We have individual solutions that address the different aspects of ADAS development from in-vehicle data collection to HIL/SIL high-performance access to archive. All of these solutions are completely interoperable to complete a fully automated end-to-end data collection and storage workflow for ADAS development.

- **In-vehicle:** Ruggedized, scalable appliance that supports in-vehicle collection
- **In-vehicle + automated ingest and access:** Ruggedized, scalable appliance that supports in-vehicle collection + automated ingest of collected data and data access to organization including HIL/SIL
- **In-vehicle + automated ingest, access, and archive:** Fully automated end-to-end enterprise deployment that includes data protection

The solution comes fully deployed, configured, and automated without day-to-day management—and is more reliable and controllable than any public cloud option.

Ruggedized Storage	Primary Storage/File System	Tape Archive
23 TB In-Car Storage	Ruggedized Storage +	Ruggedized Storage +
Ingest Chassis	Xcellis® File System Appliance	Primary Storage/ File System +
Self Installation	96 TB Primary Storage	Tape Library 50 Slots
Support / Warranty	Onsite Installation	Archiving Software
